

Fine Art

Fine art prints are more fragile than traditional photographic prints and must be displayed and handled with care. When you want the best piece of art displayed in your home or office consider these fine art finishes.

Gallery Wrap

Our Gallery Wrap is printed on canvas and the actual photograph is stretched around the frame. Some photographs are not suited for this presentation because two to three inches on each side of the photograph is wrapped around the frame. For images that work with the Gallery Wrap ... you will be most pleased. It comes in 1.5 inch or 2.5 inch frames. The gallery wrap comes ready to hang and does not require a frame. Foam board is not used with the gallery wrap and it does not require a gel coating. Therefore, it is as affordable as the pricing above and you do not need to buy an additional frame. A gel coating is available at an additional charge.
